

1997+ CAGS (Skip-Shift) Disconnect Plug Kit

Product # PM-188

Installation Instructions

1. Raise the rear of the vehicle according to owner's manual.
2. Locate the CAGS solenoid, on driver's side of transmission. (Large solenoid towards top rear of transmission.)
3. Unplug harness and install black connector into the harness.
4. Zip tie harness back onto the main harness.
5. Plug white connector into the CAGS solenoid.
6. You're all done! Lower the car and enjoy not having the 1st-to-4th shift.

Note: Your dash light will still light up for the 1st-to-4th shift, but the solenoid will not force you to go to fourth gear.
