

C4 NON POP-UP HEADLIGHTS

Installation Instructions

1. Disconnect your battery.
2. Remove four (4) nuts (*Do not discard*) from the headlight support (2 on each side) plus the two(2) screws located at the bottom of the light assembly and remove the headlight.
3. Locate the three-wire connector and disconnect it.
4. At this point, cut the connector off - leaving the three (3) wires. (Tan - Low beam, Green - High beam, Black - Ground) (**FIGURE 1**).
5. Use the terminals provided and crimp them securely to each wire. (**FIGURE 2**).
6. Take the lens and bucket - place them in the headlight opening (**FIGURE 3**), locate the two (2) lower holes on the headlight tub and hood - screw in with the screws provided. (**FIGURE 4**). At this point, locate the top tab of the headlight tub. Insert self-tapping screw into the tab and the hood, being careful not to over tighten and strip the hole.
7. Place the headlight bracket into position and mount - using the existing nuts. (**FIGURES 5 & 6**).
8. Connect the wires to the wiring harness. (Instructions, below - right)
9. Snug all the screws (*Take care not to over-tighten*) and reconnect the battery.
10. Lower your hood and check your lights for proper alignment. (Refer to your owner's manual for proper alignment specifications if needed) If alignment adjustments are required, raise the hood - make adjustments from the rear, then lowering the hood and check it again. (Repeat this procedure until alignment is correct).

*Please contact our Technical Support Department,
should you have any difficulties with the proper installation of your C4 Non-Pop Up headlight set.*
